

## REPEAT PRESCRIPTIONS

If your pet is on long term medication we can dispense medicines to you for your pet, or provide you with a prescription, as long as the following conditions are met:

1. We will reassess and examine all pets, with ongoing medical conditions, at least every 6 months. In some cases more frequent examination will be required for your pets continuing health and welfare.
2. We can only supply POM-VS medications and prescriptions to those pets that are under the care of one of our veterinary surgeons.

The standard charge for a re-examination is £22:24 including VAT. If immediate treatment is necessary or if the pet is an inpatient then a written prescription would not be necessary. You have the right to request the price of any medication prescribed.

Examples of prices of our most frequently used prescription (POM-VS) medications are as follows (**exclusive** of VAT):

1. Milbemax dog per tablet (5kg-25kg) - £4:90
2. Milbemax cat per tablet (4-8kg) - £4:37
